

## Athens Technology Center seeks for a Wordpress Developer (Athens/Thessaloniki)

### About us

As a full-service software development company, we apply modern design principles, along with the latest data science, blockchain, cloud, mobile and desktop technologies. We strive to deliver quality software solutions to Greek and international businesses, while at the same time being at the forefront of research and innovation.

### The Position

We are looking for a **Wordpress Developer** with experience in Wordpress to create, support and maintain sophisticated web applications. This role also includes a strong cooperation with other developers and product owners internationally. You will join a highly collaborative, cross-functional team, working as part of an agile development process, which regularly releases new software.

### Key duties

- Design, build and maintain websites and web applications
- Ensure the performance, quality, and responsiveness of websites and web applications
- Identify and correct bottlenecks and fix bugs
- Perform application design activities (e.g., designing user interface, usability testing)

### Minimum requirements

- Experience in designing User Interfaces for websites and/or web applications
- Demonstrable knowledge in Web Technologies: HTML, CSS & JavaScript
- Strong understanding of Wordpress CMS and PHP back-end development
- Experience in responsive design
- Comfortable working with debugging tools like Firebug, Chrome inspector, etc.
- Knowledge of how to interact with RESTful APIs and formats (JSON, XML)
- Excellent communication skills in English both verbally and written

### Additional experience in any of the following fields is a plus

- Experience in modern single-page App Framework such as ReactJS or equivalent
- Agile & Scrum methodologies

### Other skills

- Excellent analytical skills and to be structured and results orientated
- Ability to effectively communicate ideas, describe problems and solutions
- Ability to work and contribute in a team environment

## Benefits

- Competitive compensation package
- Private health coverage
- Experience and knowledge in diverse scientific areas and the possibility to explore a variety of topics
- Tailored training programme and access to cut-edge skills.
- Working with international teams and world-class institutions and clients
- Flexibility in working conditions (blend teleworking with office)
- Friendly, pleasant and creative working environment
