## IHU UNIVERSITY EXAVATION

Director: Prof. Manolis Manoledakis

About 20 km from the city of Thessaloniki, at the important **Iron Age - Archaic** site of **Trapeza Neo Rysio-Kardia**, with magnificent view over the Thermaic Gulf and the Anthemous valley, our students of both MA programmes are able to practice on the field.

The site “Trapeza of Neo Rysio-Kardia” belongs to a dense group of settlements that existed along the Thermaic Gulf before the conquest of this region by the Macedonians in the 6th century BC.

In the excavation site, several rectangular and trapezoid **buildings** came to light, built with walls whose lower parts were made of stone and the upper parts were made of clay mudbricks.

Between the buildings, the vertical and horizontal **roads** that were unearthed give an indicative image of the settlement's **urban planning** already since the Early Iron Age.

Excavation over the past years brought to light highly interesting archaeological **finds** (pottery, stone and metal tools, loom weights, bones and sea-shells).

## Third Semester - *Dissertation*

- ❖ As a part of the MA programme, students work on a subject related to their academic interests and specialization
- ❖ The Master's Dissertation provides the opportunity to **apply theory** and **concepts learned** in different courses to a topic related to ancient Macedonia or the Hellenistic kingdoms
- ❖ The Master's Dissertation tests students' ability to demonstrate reasonably original research or fieldwork
- ❖ Dissertations can also be supervised by external staff members
- ❖ Individual mentoring is offered to help students with choosing a topic, navigating bibliography and all other aspects of dissertation writing
- ❖ Academic Writing Seminars, designed to prepare students for coursework and dissertation writing, are offered throughout the programme's duration

## The Archaeological Society at Athens

When the state of Greece was founded in 1830, after the War of Independence, the first governments were immediately faced with the great problems of the economy, public administration and education. The last of these also included the question of the country's ancient treasures, which had been looted and destroyed over the centuries by traffickers in antiquities. However, the official Antiquities Service was undermanned and incapable of taking proper care of the ancient remains, and so on January 6th 1837, on the initiative of a wealthy merchant named Constantinos Belios, a group of scholars and politicians founded the Archaeological Society at Athens with the objects of locating, re-erecting and restoring the antiquities of Greece.

### The Project

The *Sylloge Nummorum Graecorum* is a [British Academy](#) Research Project, the purpose of which is to publish illustrated catalogues of Greek coins in public and private collections in the British Isles.

SNG has retained the traditional, very broad, definition of 'Greek' to include the coins produced by all ancient civilisations of the Mediterranean and neighbouring regions except Rome, though it does include the Roman Provincial series often known as 'Greek Imperials'.

The project was inaugurated in 1931 with the publication of the collection of Capt. E. G. Spencer-Churchill. A new and distinctive format was used, with text and illustrations on facing pages. This meant that only limited text was included, with the illustrations having greater prominence than in earlier types of catalogues, and to some extent replacing textual descriptions. This is because the primary purpose of SNG was to make much more material available for study. This format has been retained ever since and has been adopted, along with the title *Sylloge Nummorum Graecorum*, for similar projects in many other countries, including Denmark, France, Germany, Greece, Israel, Sweden, Switzerland and the United States.

To date, the British SNG project has published over 30 fascicules from many different public and private collections, and the total world-wide exceeds 120 volumes. The project is supported by the Union Académique Internationale and information on SNG activities world-wide is now co-ordinated by the International Numismatic Commission. The SNG format has effectively become standard for the cataloguing of Greek coins for academic study, and it has also been adopted for other series, e.g. the *Sylloge of Coins of the British Isles* (SCBI).
