

# **VPN** Configuration Guide Windows 11

Dept. of Information & Telecommunication Systems & Services, IHU

## VPN Setup

1. Right-click on the network icon in the lower right of the monitor on the taskbar and select **Network and Internet settings**. It will bring you to the Network & Internet tab in the Windows Settings.

2. In the new window, find and select the VPN.

÷	Settings					—		×
	@gmail.com	Netv	vork	& intern	net			
Fir	nd a setting D	$\square$	₽	Ethernet0				
	System	Ŀ	г	Connected				
8	Bluetooth & devices	⊖ Pr	operties		Data u	usage		、
-	Network & internet	U <sub>Pu</sub>	blic netw	ork	G <sub>4.58 GI</sub>	B, last 30 c	lays	Í
/	Personalization	٦	Etherne	ł				\$

٥	Time & language		,					
3	Gaming	Ţ.	Proxy Proxy se	rver for Wi-Fi and E	thernet connec	tions		>
X	Accessibility		D:-1					
٠	Privacy & security	ŝ	Set up a	dial-up internet cor	nnection			>
3	Windows Update		Advanc	ed network settin	ıgs			

#### 3. Click the Add VPN in VPN connections

4. In the new popup, just specify the following parameters:

VPN provider: Leave the default selection (built-in)

**Connection name:** It's the name used to identify the connection. Name it whatever you like e.g. IHU VPN

Server name or address: Enter vpn1.ihu.edu.gr

VPN type: Select L2TP/IPSEC with pre-shared key

After selecting the aforementioned VPN type, the Pre-shared key field shows up: Enter IHU\_VPN\_2016

#### Type of sign-in info: Select Username and Password

Then enter your VPN username and password.

The VPN account is different than the uregister account, but their username is the same. To set up your VPN password, visit the following page: <u>https://support.ihu.edu.gr/reset\_password/</u>

	←	Settings				- c	]	$\times$

### Connection to VPN

After you have successfully added the VPN, you can find that it is listed under the VPN connections. You can click the **Connect** button to connect your computer to this VPN. Or, you can find and connect to this VPN by clicking on the network icon on the taskbar.
